- Used mobile first design to develop and maintain the front-end portion of a web app, while also developing and maintaining a backend database and API to be used by said web app.
- Built and maintained a database and API being used as a backend for a mobile app.
- Technologies include Node.js, AngularJS, PostgreSQL, and MongoDB.

Harvey Plum Creative LLC, New Brunswick, NJ

2015 - 2016

Freelance Web Developer

Worked with a senior web developer on several projects.

- **[Versa Valves](#) (2016)**- Helped with the implementation of new front end design, templating and CSS for many aspects of the site.
- **[Cho Legal Group](#) (2016)**- Collaborated on design of a new website for Cho Legal Group and moved content to the new site.
- **[NewBrunswickToday.com](#) (2015-2016)**- Assisting with front end development of new website design, and code that allows readers to tweet a quote from an article along with a link. Links: [Demo](#), [GitHub Repo](#)

Applications I've Built

- **[YouTube 'n Chill](#) (2015 - Present)**- A website that allows users to watch YouTube videos while chatting with other users watching the same video. I was responsible for the YouTube search functionality, the embedding of videos using the YouTube API, Firebase, JavaScript, jQuery, and HTML5. Links: [GitHub Repo](#), [Deployed Site](#)
- **[Jobbies](#) (2016)**- Jobbies is a job board for small one time jobs, such as mowing someone's lawn, or painting someone's fence. Developed using the MEAN stack. Links: [Github Repo](#), [Deployed Site](#)
- **[LIRI](#) (2016)**- LIRI is a text based version of SIRI written in Node.js. It is a command line application that runs in terminal. It has several features, such as displaying tweets you've made, and displaying data about movies or songs you search for. It uses the twitter API, Spotify API, the OMDb API, and several npm packages. Links: [Github Repo](#)
- **[YelpRU](#) (2016)**- YelpRU is a crowdsourced Yelp clone for the Rutgers New Brunswick area. Registered users can add and review businesses. Built using a SQL database, Node.js, Sequelize, Handlebars, Express, and several other npm packages. Links: [Github Repo](#), [Deployed Site](#)

OTHER EXPERIENCE

Classic TV & Radio, New Brunswick, NJ
